I. Reserch Papers

1. M. Hieber, Y. Naito and <u>Y. Shibata</u>, On the Non-newtonian fluid in an exterior domain in three dimensions, J. Differential Equations 252 (2012), 2617-2629.

2. <u>Y. Shibata</u> and Senjo Shimizu, On the maximal Lp - Lq regularity of the Stokes problem with first order boundary condition; model problems, J. Math. Soc. Japan, 64(2)(2012), 561-626

3. Y. Enomoto and <u>Y. Shibata</u>, On some decay properties of Stokes semigroup of compressible viscous fluid flow in a 2-dimensional exterior domain, J. Differential Equations, 252 (2012), 6214-6249

4. Y. Enomoto and <u>Y. Shibata</u>, About compressible viscous fluid flow in a 2-dimensional exterior domain, Spectral theory, mathematical system theory, evolution equations, differential and difference equations, 305-321, Oper. Theory Adv. Appl., 221 Birkhauser/ Springer Basel Ag, Basel, 2012

5. <u>Y. Shibata</u>, On a generalized resolvent estimates of the Stokes equations with first order boundary condition in a general domain, J. Math. Fluid Mech. 15(2013), 1-40.

6. Y. Enomoto and <u>Y. Shibata</u>, On the R-sectoriality and the initial boundary value problem for the viscous compressible fluid flow, to appear in Funkcialaj Ekvacioj

7. J.Fan and <u>T.Ozawa</u>, Uniqueness of weak solutions to the 3D Ginzburg-Landau model for superconductivity. Int. J. Math. Anal. (Ruse) 6 (2012), no. 21-24, 1095-1104.

8. J.Fan and <u>T.Ozawa</u>, Continuation criterion for the 2D liquid crystal flows. ISRN Math. Anal. 2012, Art. ID 248473, 7 pp.

9. J.Fan and <u>T.Ozawa</u>, Regularity criterion for the 3D nematic liquid crystal flows. ISRN Math. Anal. 2012, Art. ID 935045, 10 pp.

10. J. Fan and <u>T.Ozawa</u>, Global strong solutions of the time-dependent Ginzburg-Landau model for superconductivity with a new gauge. Int. J. Math. Anal. 6 (2012), no. 33-36, 1679-1684.

11. J.Fan and <u>T.Ozawa</u>, Uniqueness of weak solutions to the Ginzburg-Landau model for superconductivity. Z. Angew. Math. Phys. 63 (2012), no. 3, 453-459.

12. S.Katayama, <u>T.Ozawa</u> and H.Sunagawa, A note on the null condition for quadratic nonlinear Klein-Gordon systems in two space dimensions. Comm. Pure Appl. Math. 65 (2012), no. 9, 1285-1302.

13. J.Fan and T.Ozawa, Regularity criteria for hyperbolic Navier-Stokes and related system. ISRN Math. Anal. 2012, Art. ID 796368, 7 pp.

14. T.Ozawa and H.Sunagawa, Small data blow-up for a system of nonlinear Schrodinger equations, J. Math. Anal. Appl., 399(2013), 147-155.

15. K.Nakamura and T.Ozawa, Finite charge solutions to cubic Schrodinger equations with a nonlocal nonlinearity in one space dimension. Discrete Contin. Dyn. Syst. 33 (2013), no. 2, 789-801.

16. Y. Cho, G. Hwang and T.Ozawa, Global well-posedness of critical nonlinear Schrodinger equations below L2, Discrete and Continuous Dynamical Systems A, 33(2013), 1389-1405.

17. S. Machihara and T.Ozawa, Some inequalities related to the Lorentz spaces, Hokkaido Math. J., (in press)

18. Y. Cho and T.Ozawa, A note on the existence of nontrivial solutions to a semilinear elliptic problem, Kyushu J. Math., (in press)

19. T.Ozawa and K. Rogers, Sharp Morawetz estimates, J. d' Anal. Math., (in press)

20. T. Gonda, S.Machihara and T.Ozawa, On the semilinear Schr¨ odinger equation with time dependent coefficients, Math. Nachr., (in press)

21. T.Ozawa and K. Rogers, A sharp bilinear estimate for the Klein-Gordon equation in R1+1, Int. Math. Res. Not. IMRN (in press)

22. N. Hayashi, T.Ozawa and K. Tanaka, On a system of nonlinear Schr¨ odinger equations with quadratic interaction, Ann. Inst. Henri Poincare, Analyse non lineaire (in press)

23. S. Machihara T.Ozawa and H. Wadade, Hardy inequalities on balls, Tohoku Math. J. (in press)

24. G. Hoshino and T.Ozawa, Analytic smoothing effect for nonlinear Schrodinger equation in two space dimensions, Osaka J. Math. (in press)

25. Y. Cho, H. Hajaiej, G. Hwang and T.Ozawa, On the Cauchy problem of fractional Schrodinger equation with Hartree type nonlinearity, Funkcilaj Ekvacioj (in press)

26. N.Ikoma and H.Ishii, Eigenvalue problem for fully nonlinear second-order elliptic PDE on balls. Ann. Inst. H. Poincare Anal. Non Lineaire 29 (2012), no. 5, 783-812.
