

I. Reserch Papers

1. Y. Shibata, Generalized Resolvent estimates of the Stokes Equations with first Order Boundary Condition in a General domain, *J. Math. Fluid Mech.* 15 (2013), 1-40
2. Y. Enomoto, Y. Shibata, On the R-sectoriality and the initial boundary value problem for the viscous compressible fluid flow, *Funkcialaj Ekvacioj* 56 (2013), 441-505
3. Y. Enomoto, L. von Below, Y. Shibata, On some free boundary problem for a compressible barotropic viscous fluid flow, *Annali dell'Universita di Ferrara* (2013), DOI:10.1007/s11565-013-0194-8.
4. Y. Shibata, On the R-boundedness of solution operators for the Stokes equations with free boundary condition, *Differential and Integral Equations* 27 (2014), 313-368.
5. Y. Shibata, On the R-boundedness of the solution operators in the study of compressible viscous fluid flow with free boundary conditions, to appear in *Asymptotic Analysis*.
6. T. Ozawa, H. Sunagawa, Small data blow-up for a system of nonlinear Schrödinger equations, *J. Math. Anal. Appl.*, 399(2013), 147-155.
7. K. Nakamura, T. Ozawa, Finite charge solutions to cubic Schrödinger equations with a nonlocal nonlinearity in one space dimension, *Discrete and Continuous Dynamical Systems A*, 33(2013), 789-801.
8. Y. Cho, G. Hwang, T. Ozawa, Global well-posedness of critical nonlinear Schrödinger equations below L^2 , *Discrete and Continuous Dynamical Systems A*, 33(2013), 1389-1405. DOI: 10.3934/dcds.2013.33.1389
9. Y. Cho, T. Ozawa, A note on the existence of nontrivial solutions to a semilinear elliptic problem, *Kyushu J. Math.*, 67(2013), 227-236.
10. J. Fan, T. Ozawa, Regularity criteria for a coupled Navier-Stokes and Q-tensor system, *International Journal of Analysis*, 2013(2013), Article ID 718173, 5pages, DOI : 10.1155/2013/718173
11. S. Machihara, T. Ozawa, Some inequalities related to the Lorentz spaces, *Hokkaido Math. J.*, 42(2013), 247-267.
12. G. Hoshino, T. Ozawa, Analytic smoothing effect for a system of nonlinear Schrödinger equations, *Differential Equations and Applications - DEA*, 5(2013), 395-408.
13. N. Hayashi, K. Tanaka, T. Ozawa, On a system of nonlinear Schrödinger equations with quadratic interaction, *Ann. Inst. Henri Poincaré, Analyse non linéaire*, 30(2013), 661-690.

14. S. Machihara, T. Ozawa, H. Wadade, Generalizations of the logarithmic Hardy inequality in critical Sobolov-Lorentz spaces, *J. Ineq. Appl.*, 2013, 2013 : 381 DOI : 10.1186/1029-242X-2013-381
15. S. Machihara, T. Ozawa, H. Wadade, Hardy inequalities on balls, *Tohoku Math. J.*, 65(2013), 321-330.
16. Y. Cho, H. Hajaiej, G. Hwang, T. Ozawa, On the Cauchy problem of fractional Schrödinger equation with Hartree type nonlinearity, *Funkcialaj Ekvacioj*, 56(2013), 193-224.
17. J. Fan, T. Ozawa, A regularity criterion for compressible nematic liquid crystal flows, *ISRN Mathematical Analysis*, 2013(2013), Article ID 271324, 4pages, DOI:10.1155/2013/271324
18. J. Fan, T. Ozawa, Global existence of strong solutions to a time-dependent 3D Ginzburg-Landau model for superconductivity with partial viscous terms, *Math. Nachr.*, 286(2013), 1792-1796. DOI:10.1002/mana.201200050
19. K. Rogers, T. Ozawa, Sharp Morawetz estimates, *J. d' Anal. Math.*, 121(2013), 163-175. DOI:10.1007/s11854-013-0031-0
20. K. Fujiwara, T. Ozawa, Exact remainder formula for the Young inequality and applications, *International Journal of Mathematical Analysis*, 7(2013), 2723-2735.
21. J. Fan, T. Ozawa, Regularity criteria for the 2D MHD system with horizontal dissipation and horizontal magnetic diffusion, *Kinetic and Related Models*, 7(2014), 45-56.
22. Y. Cho, H. Hajaiej, G. Hwang, T. Ozawa, On the orbital stability of fractional Schrödinger equations, *Commun. Pure Appl. Anal.*, 13(2014), 1267-1282.
23. J. Fan, T. Ozawa, A blow-up criterion for the 3D full magnetohydrodynamic equations, *International Journal of Mathematical Analysis*, 8(2014), 101-108.
24. G. Barles, H. Ishii, H. Mitake, A new PDE approach to the large time asymptotics of solutions of Hamilton-Jacobi equations. *Bull. Math. Sci.* 3 (2013), no. 3, 363-388.
