

Message from Yoshikazu Giga from University of Tokyo

Dear Professor Shibata and Professor Ozawa,

Congratulations on having a new institute for nonlinear PDEs. I wish I could attend this symposium and party to celebrate this special occasion.

However, my obligation in this week prevented me to come.

Having this new and unique institute we hope our researches on PDE and related fields become more active and have strong influence to other disciplines both inside and outside Waseda University.

Yoshikazu Giga
University of Tokyo
